

ASWIN G

Chennai, India

☎ +91-6369539734 ✉ aswnganesan30@gmail.com 🔗 linkedin.com/in/aswin-g

Technical Skills

Languages: Java, JavaScript, Python, Bash, SQL
Frontend: Angular, HTML5, CSS3, TypeScript
Backend: Node.js, Express.js, RESTful APIs
Databases: PostgreSQL, MySQL, MongoDB, Redis
Cloud & DevOps: AWS (EC2, S3, IAM, CloudWatch), Jenkins, Terraform, Ansible, Docker
Tools & Frameworks: Git, Linux, Apache, Nginx, TensorFlow/Keras

Experience

DevOps Engineer Intern

Dec 2025 – Present

Educational Initiatives Private Limited

Bengaluru, India

- Designed and implemented a centralized Jenkins CI/CD pipeline automating build, test, and deployment processes, reducing deployment time by 60% and eliminating manual release steps
- Built AWS Multi-Product Deployment Framework using Jenkins, Terraform, and AWS services (EC2, AMI, Auto Scaling Groups) enabling zero-downtime releases across multiple applications
- Developed 10+ modular Ansible playbooks for automated infrastructure provisioning, reducing developer onboarding time from 3 hours to under 10 minutes
- Managed Node.js and Angular microservices deployment using PM2, achieving consistent uptime and zero-downtime restarts across development environments
- Administered Linux servers (Ubuntu/CentOS) for 8+ developers, handling log analysis, monitoring, user management, and incident troubleshooting

Projects

AWS Infrastructure Automation Platform | *Jenkins, Terraform, AWS, Ansible*

- Built end-to-end automated deployment platform supporting AMI creation, Launch Template versioning, Auto Scaling Group updates, and health validation with rollback capabilities
- Implemented immutable infrastructure strategy using Terraform and AWS services, eliminating configuration drift and reducing deployment risk
- Created 7-stage Jenkins pipeline with safe scaling logic and 3-option rollback strategy, enabling recovery from failed deployments within minutes

Multi-Server Infrastructure Automation | *Ansible, Linux, PostgreSQL, Redis, Node.js*

- Designed production-grade Ansible automation framework using agentless SSH architecture for complete environment provisioning across multiple servers
- Automated full software stack installation (Apache, PostgreSQL 16, Redis 7.2, Node.js, Angular CLI) using structured Ansible roles with Jinja2 templates
- Integrated Ansible with Jenkins CI/CD pipeline, enabling automated deployment without manual SSH intervention while ensuring idempotency and production reliability

YouTube Spam Comment Detection | *Python, TensorFlow/Keras, LSTM, NLP*

- Built LSTM-based text classifier achieving 87% accuracy in detecting YouTube spam comments using deep learning techniques
- Implemented comprehensive NLP preprocessing pipeline including tokenization, padding, and word embeddings for text data
- Evaluated model performance using accuracy and F1-score metrics on benchmark datasets with proper train-test splits

Education

Bachelor of Technology in Artificial Intelligence & Data Science

Expected 2024

Panimalar Engineering College, Anna University

Chennai, India

CGPA: 8.1/10.0

Certifications

Java Problem Solving - CodeChef • Full Stack Development - Besant Technologies
